[Paid Ads Plan](#)

Prepared August 23, 2026

Basera — Marketing & Social Media Plan

The complete go-to-market content and advertising plan: organic social strategy, a ready-to-use daily content prompt system, and a paid-advertising plan layered on top — designed to launch alongside Phase 1B's go-live.

1. Brand Recap

- **Name:** Basera (Urdu for "nest, shelter, abode") — **Tagline:** "Find your Basera."
- **Colors — "Coral Modern":** Coral #FF6B4A (primary/CTAs), Deep Navy #1B2A4A (headers/dark UI), Sunflower Yellow #FFC857 (badges/highlights), Warm off-white #FFF8F5 (background).
- **Voice:** warm, trustworthy, a little witty, never corporate-sounding — like a helpful senior student, not a real estate agency.

2. Platform Strategy

Facebook remains Pakistan's largest platform by user count (~101.6 million), with YouTube close behind (~96.6 million) and TikTok fastest-growing among adults 18+ (~90.3 million, and the platform young people reach for first). Instagram is smaller in absolute terms (~24 million) but skews heavily toward the 18–24 bracket — Basera's core student audience — and is where "verified, aesthetic, trustworthy" brand visuals land best. WhatsApp is near-universal and already wired into the product as a support channel, making it a natural funnel extension rather than a separate platform to manage from scratch.

Platform	Role	Content Style
Instagram	Primary brand channel	Reels, carousels, Stories — verified listings, student life, city guides
TikTok	Growth/reach engine	Short, native-feeling video — room tours, "day in the life," myths vs. facts

Platform	Role	Content Style
Facebook	Broadest reach, older/parent audience, city groups	Listings, safety/trust messaging, community group engagement
WhatsApp	Direct response & community	Broadcast lists, city/university channels, the in-app WhatsApp button
YouTube	Long-form trust content	Full hostel tours, "how escrow protects your rent" explainers, host interviews
LinkedIn	Host/property-partner acquisition, B2B credibility	Host success stories, platform milestones, hiring

3. Content Pillars

1. **Verified & Safe** — verification badges, escrow protection, safety features, real reviews. Basera's actual differentiator versus informal Facebook-group room hunting.
2. **Real Listings** — featured rooms/hostels, price comparisons, "new this week," city-specific inventory.
3. **Student Life** — relatable content unrelated to booking (exam season, mess food, budgeting, roommate humor) — builds reach without selling.
4. **City & Campus Guides** — practical, SEO-friendly content ("Best areas to live near NUST") that doubles as shareable, evergreen content.
5. **Host & Community Stories** — testimonials from hosts and students, building two-sided marketplace trust.

4. Weekly Posting Cadence

Day	Theme	Pillar	Primary Platform
Monday	Listing Spotlight	Real Listings	Instagram + Facebook
Tuesday	Trust & Safety Tip	Verified & Safe	Instagram + LinkedIn
Wednesday	City/Campus Guide	City & Campus Guides	TikTok + YouTube Shorts
Thursday	Student Life / Relatable	Student Life	TikTok + Instagram Reels
Friday	Host or Student Story	Host & Community Stories	Instagram + Facebook

Day	Theme	Pillar	Primary Platform
Saturday	Price/Deal Highlight	Real Listings	WhatsApp broadcast + Instagram Stories
Sunday	Community Q&A / Myth-busting	Verified & Safe	Instagram + Facebook

Post at least once per day per active platform; Instagram and TikTok can support a second Stories/short-video post on high-activity days (semester start, exam season, Eid, back-to-campus in September/February).

Sample 4-week content calendar

Week	Mon	Tue	Wed	Thu	Fri	Sat	Sun
1	Featured girls' hostel, Lahore	"What 'verified' actually means"	Best areas near LUMS	Mess menu meme/poll	Student testimonial video	Weekend price drop roundup	Q&A: "Ask us about deposits"
2	Featured PG, Islamabad	Escrow explainer carousel	Cost of living: Karachi vs. Islamabad	"Roommate red flags" Reel	Host story: why they joined	Flash discount code post	Myth: "hostels near campus are always expensive"
3	Featured shared room, Karachi	Safety feature: contact gating explained	Best areas near NUST	Exam season survival tips	Student story: first move-in	New listings this week roundup	Poll: "What matters most in a hostel?"
4	Featured studio, Faisalabad	How disputes get resolved	Best areas near FAST	Budgeting-on-a-student-budget carousel	Referral spotlight	Weekend price drop roundup	Q&A: booking process walkthrough

Rotate cities and universities each month so coverage stays fresh and locally relevant.

5. Hashtags, Timing & KPIs

Hashtag sets (rotate, don't repeat every post): #BaseraPK #StudentHousingPakistan
#HostelLife #PGAccommodation #LahoreStudents #IslamabadStudents #KarachiStudents
#NUSTHostel #LUMSHostel #FASTHostel #VerifiedHostel #StudentLifePakistan

Best posting windows: 7–9pm weekdays (after classes), 12–2pm / 8–10pm weekends. Avoid posting during exam-week evenings unless the content is exam-support themed.

KPIs to track monthly: follower growth rate, saves/shares per post (a stronger buying-intent signal than likes for a housing decision), click-throughs from bio/story links, WhatsApp broadcast opt-ins, and — most importantly — **attributed signups/bookings from social traffic** (UTM-tag every link).

6. Daily Claude Prompt System

Use one prompt per day, filling in the bracketed details. Paste the **Master Prompt** into Claude each morning; it already encodes Basera's brand voice, platform mix, and today's theme from the calendar above.

Master Daily Prompt (use this one, every day)

You are writing social media content for Basera (basera.pk), a verified student hostel and room marketplace in Pakistan. Brand voice: warm, trustworthy, a little witty, never corporate-sounding – like a helpful senior student, not a real estate agency. Primary colors are coral (#FF6B4A) and navy (#1B2A4A).

Today's theme: [INSERT TODAY'S THEME FROM THE CONTENT CALENDAR, e.g.

"Listing Spotlight" or "Trust & Safety Tip"]

Today's specific topic/listing: [INSERT DETAILS, e.g. "3-bed girls' hostel near Punjab University, Lahore, PKR 18,000/month, verified, WiFi + laundry included" or "explain how escrow protects a student's rent payment"]

Target platform(s): [INSERT, e.g. "Instagram Reel + Facebook post"]

Write:

1. A short hook line (under 12 words) to open a video or carousel.
2. Full caption copy (Instagram/Facebook length, ~80-150 words), written in a mix of English with light, natural Urdu/Roman-Urdu phrasing where it would sound authentic to a Pakistani student audience (don't overdo it).
3. A one-line call to action pointing to the Basera app/site.
4. 8-10 relevant hashtags, mixing broad and city/university-specific tags.
5. If this is a video-first platform (TikTok/Reels), also write a 3-5 shot list describing what to film.

Keep it factual – don't invent statistics, prices, or guarantees Basera doesn't actually offer. If unsure about a specific claim, phrase it generally instead of making up a number.

Day-specific variants (optional, for tighter platform copy)

Monday — Listing Spotlight:

Write an Instagram carousel (5 slides) spotlighting this Basera listing: [paste listing details]. Slide 1 = hook + price, slides 2-4 = key selling points (location, amenities, verification status), slide 5 = CTA to view/book. Keep captions per slide under 15 words. Match Basera's warm, student-to-student voice.

Wednesday — City/Campus Guide:

Write a TikTok/Reels script (30-45 seconds) titled "Best areas to live near [university], [city]" for Basera. Structure: hook (3 sec), 3 quick area recommendations with one line each on why, close with "see verified options on Basera." Keep it fast-paced and genuinely useful, not just promotional.

Thursday — Student Life / Relatable:

Write a relatable, funny short-form video concept (TikTok/Reels) about [topic, e.g. "roommate habits," "mess food vs. home food," "exam week survival"] that a Pakistani university student would actually laugh at and share. Keep any Basera branding light – one soft mention or on-screen logo, not a hard sell. Include the hook line and a 3-4 beat script.

Friday — Host/Student Story:

Turn this real quote/story into a short testimonial post for Instagram and Facebook: [paste the quote or story details]. Write a warm intro sentence, the testimonial itself (lightly cleaned up but keep their authentic voice), and a closing line connecting it back to Basera's verified/trust promise.

Sunday — Community Q&A:

Generate 5 common questions Pakistani students ask when looking for hostel accommodation, with clear, honest, non-salesy answers reflecting how Basera

actually works (verification, escrow-protected payments, contact gating before booking). Format as a Q&A carousel or Stories Q&A sticker set.

Treat Claude's output as a strong first draft, not a final, unsupervised post — especially for anything stating a specific price, policy, or guarantee. Update the content calendar monthly to reflect real inventory, active promotions, and the academic calendar rather than following the generic rotation indefinitely.

7. Paid Advertising Plan

7.1 Cost benchmarks (Pakistan, 2026)

Meta (Facebook/Instagram) remains the most cost-efficient paid channel in Pakistan: CPM typically runs **\$0.80–\$1.50**, among the cheapest in Asia, with Facebook traffic-campaign CPC around **PKR 140–250** (lead-generation campaigns run higher, roughly **PKR 281–845 per lead**) — actual cost depends heavily on industry and targeting precision. Instagram CPCs and CPMs run 20–40% above Facebook's in the same market, arguing for using Instagram mainly for high-intent retargeting and Facebook for broad-reach prospecting. Costs rise in Q4 (October–December) and are cheapest in Q1 (January–March) — worth timing a launch push around Q1 or the admissions season rather than year-end.

Sources: NextSol — "Facebook Ads in Pakistan: How Much Do They Cost"; Adamigo — "Meta Ads CPM & CPC Benchmarks by Country 2026"; Unboxed — "Facebook, Instagram & TikTok Ads Cost in Pakistan 2026".

7.2 Funnel & channel roles

Figure 1: How a prospective student moves from first seeing Basera to becoming a retained, referring user.

Stage	Goal	Primary Channel	Ad Format
Awareness	Get "verified hostel booking" into consideration	Facebook, TikTok	Video/Reels, broad interest + lookalike targeting
Consideration	Drive traffic to real listings	Instagram, Google Search	Carousel/collection ads, Search ads on "hostel near [university]"
Conversion	Get the booking/signup started	Instagram/Facebook retargeting	Dynamic listing ads pulling live inventory, lead-gen forms
Retention	Bring students back for renewals, referrals, rewards	WhatsApp broadcast, email/push	Owned channels, not paid

7.3 Campaign structure

Campaign 1 — Brand/Trust Awareness. Video views + reach. Creative: 15–30s videos on escrow protection, verification badges, and roommate visibility ("Know who you're rooming with before you book"). Audience: broad, 18–26, Pakistan, interest in "university"/"hostel"/"PG accommodation," layered with a lookalike of site visitors once pixel data exists.

Campaign 2 — City/University Conversion. Traffic/conversions, one ad set per major city (Islamabad, Lahore, Karachi, Rawalpindi) with dynamic creative pulling real listing photos/prices. Audience: 18–24, geo-targeted within ~15km of each major university, layered with "recently moved" and admissions-season custom audiences (July–September and January–February intake windows).

Campaign 3 — Hostel Groups & Host Acquisition (B2B). Lead generation targeting hostel/PG owners, especially multi-property owners who'd benefit from the Hostel Groups feature ("List your whole chain under one verified brand"). Channel: LinkedIn + Facebook. This is the growth lever for *supply*, not demand — underinvested in most hostel-marketplace marketing plans.

Campaign 4 — Hotels & Guest Houses (new vertical launch). Awareness + conversion for travellers, entirely separate creative from the student campaigns (family trip to Murree/Naran, not university proximity). Audience: 25–45, interest in "travel Pakistan," "Murree," "Naran Kaghan," seasonal push before summer/winter tourist seasons. Google Search ads on "guest house Murree booking" queries likely outperform social here, since travel booking is higher-intent search behaviour.

Campaign 5 — Retargeting. Conversions, audience = site visitors who viewed a listing but didn't book (7/14/30-day windows), creative = the specific listing they viewed (dynamic ads) plus

a light incentive (referral points, a limited-time waived service fee).

7.4 Suggested monthly budget allocation

Campaign	% of Budget	Rationale
Brand/Trust Awareness	20%	Builds the audience pools every other campaign retargets
City/University Conversion	40%	Core demand-generation, highest volume
Hostel Groups & Host Acquisition	15%	Supply-side growth, smaller audience, higher value per lead
Hotels & Guest Houses launch	15%	New vertical, needs its own proof period before scaling
Retargeting	10%	Small audience, disproportionately high conversion rate

Start with the smallest budget that produces statistically meaningful data per campaign (Meta generally wants ~50 conversions per ad set per week to exit learning phase) rather than spreading a small budget too thin across all five at once — in month one, prioritize City/University Conversion and Retargeting, then layer in the others as budget grows.

7.5 Creative angles by feature (organic and paid)

- **Escrow protection:** *"Your rent is protected until you move in — not before."* Directly answers the #1 fear (paying and the room not existing/matching).
- **Roommate visibility:** *"See who you'll be living with — before you book."* Screenshot-style ad showing the occupant summary. A genuinely novel differentiator worth leading with.
- **Hostel Groups:** B2B — *"One verified brand, every branch."* B2C — search-result creative showing a recognizable group badge, using the same trust signal chain retailers use.
- **Hotels & Guest Houses:** Lifestyle-first creative (a family or friend group at a scenic guest house), not feature-first — this audience buys on the destination, not platform mechanics.
- **AI Concierge:** *"Ask Basera anything about your move — get a real answer in seconds."* Useful for retargeting users who bounced without booking.

7.6 Measurement

Track **cost-per-booking** (not just cost-per-click/lead) as the north-star paid metric — install the Meta Pixel and Google Ads conversion tracking on the booking-confirmation step, and pass UTM parameters through to the existing referral/loyalty tracking so paid-acquired users can be compared against organic/referral users for retention. Review weekly for the first month, then move to monthly once campaigns stabilize.

8. How the Organic and Paid Plans Work Together

Use the organic plan (§1–6) for the always-on content engine, and the paid plan (§7) for time-boxed pushes layered on top — the two should share creative concepts (roommate-visibility and hotel-launch angles work in both organic posts and paid ads) rather than running as disconnected efforts.
